

Product Information | EcoCrete

Overview

Our EcoCrete is made up of basalt aggregate, recycled concrete aggregate, coarse sand, fine sand and triple blended eco cement (a combination of slag, fly ash and cement).

EcoCrete is designed to provide domestic and commercial customers with a sustainable and eco-friendly alternative to normal concrete products.

This product can be used for all concrete applications including paving, driveways, paths, patios, house and building slabs, footings and blinding.

Our EcoCrete mixes include 15, 20, 25, 32 and 4 MPa.

Applications and uses

- Paving and paths
- Driveways
- House and building slabs
- Blinding and footings

Benefits of use

- Locally sourced ingredients
- Supports circular economy
- Eco friendly alternative

Why customers love this product
